

The Lecture Meeting of The Fascination of Overseas Study

On October 31st in 2019, professor Ushida Chizuru at Nanzan University came to our school and we held a workshop for second graders.

In the first half, we heard about the definition of Latin America and the cultures of other countries with geographic information. And in, the second half, we were provided with Q&A time. We questioned the points we didn't understand in the lecture to the professor, and she answered it politely. Professor Ushida talked based on her own experience and gave us an interest in studying abroad.

Opinion

- I am attracted to Spain.
- I admire Professor Ushida.
- It is important to challenge things.
