

Chinese lesson

October 20th and November 10th, a Chinese lecture was held by Ms. Shu. The first lecture, she mainly told us about Taiwan. And we could learn about Taiwan, its sightseeing spots, and its relationship with Japan. For the second lecture, she told us the basics of Chinese. Finally, we became able to greet and introduce ourselves in Chinese.

Opinion of Students

- We had a good time because we don't usually have time to learn another language.
- I liked most about how to count numbers in Chinese. When we count numbers, we use our hands. I learned something different from Japan's culture and customs.
- I had no interest in Chinese before I took this lecture, but now I am curious about Chinese, because it has difficulty and fun that Japanese doesn't have. There are words I always hear at the shopping mall, and now I can understand the meaning. It's so much more fun, now that I have learned a little of another language.
