

The 5th ANNUAL SPEECH CONTEST at KITA HIGH SCHOOL

Giving speeches about SDGs

On January 29, we invited three foreign instructors and 2 members of UNESCO Association as judges, and held the annual speech contest at KITA high school. Through a vinyl curtain, we made speeches about global issues.

<Student's Thoughts>

1st Grade

- I got right into my part, so I could speak in a loud voice.
- The senior students' speeches were wonderful. I felt uneasy about next year, because I will have to do the same things.
- Listening to the senior students' oral interpretations, I realized I am not there yet, but, I did my best.

2nd Grade

- I tried to do my best, such as the seniors last year who were amazing. Their performance is easy to remember. I had a louder voice than last year, but I had hard time with my voice intonation. We had only a short time to practice, so I practiced over and over again until the end of the week. I think I did my best.
- I felt a little nervous speaking English, but I realized it was worse to be shy and have no confidence.
- We hit a wall so many times, but in the Oral Interpretation, we could speak with confidence and we could express what we wanted.
- At first, it was hard for us to understand the sentences. I was irritated and it was stressful. In the end, we could do our best. These are good memories, because I learned many things from Oral Interpretation.
- It was hard for me to speak, have good intonation, and remember 500 words, but we practiced a lot. It became a good memory and I began to get along with my classmates.
